TRACSTAR

Fusion capability for 16" OD to 48" OD (450mm - 1200mm) pipe

OVERVIEW

The McElroy TracStar® 1200 brings larger pipe capability to its line of selfpropelled, track-mounted fusion machines. The TracStar 1200 butt fuses pipe from 16" OD to 48" OD (450mm to 1200mm) and can traverse most any terrain.

The self-contained machine features an on-board generator for powering the heater and facer, which is now positioned between the fixed jaws for easier pipe transfer. The carriage can be easily removed for in-ditch use. The engine is available with advanced emission control technology that meets the EPA's latest Tier 4 standards, without the need for diesel exhaust fluid (DEF). An Auto TracStar 1200 is available upon request.

FEATURES

- Patented Centerline Guidance System for equal distribution of force around the joint
- ISO-compliant industrial Teflon-coated heater plates
- Advanced blade design for smooth face and long life
- DataLogger® compatible
- Removable 3- or 4-jaw carriage for in-ditch use
- Hydraulic outriggers for machine stability and leveling
- Dual hydraulic pipe lifts aid in loading and unloading pipe
- Serrated jaws and inserts keep pipe from slipping during fusion
- Hydraulic pivoting heater and facer
- Wireless remote driving control
- Dual-speed tracks
- Ergonomic operator platform
- Redesigned cowling allows easy access for machine maintenance
- Remote engine stop/start capabilities
